DETAILED ACTION

Receipt of applicants' amendments and remarks submitted September 18, 2007 is acknowledged.

Double Patenting Rejections

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 4-7 and 14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8, 10-20 of U.S. Patent No. 5,998,457. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '457 are drawn to method regulating imbalance of body weight, particularly obesity, or treating weight gain related disorder by administering a creatine compound.

Claim Rejections 35 U.S.C. 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1,4-7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Almada et al. (US Patent 5,627,172, and US 5,726,146, IDS), in view of Meisner (US Patent 4,647,453, IDS) and Ishikawa et al. (JP 07196485).
- 5. Almada ('172) teaches that creatine derivatives are known to be useful as hypolipidemic agents and are useful for treating hyperlipidaemia, a disorder associated with obesity. See the abstract, col. 2, and line 60 to column 3, line 35, and the claims. Almada ('146) suggest that creatine is useful for regulate body weight, i.e., increase lean body mass and decrease fat mass. See, the abstract and the claims.

The primary references do not teach expressly the employment of creatine for the treatment of subject with obesity.

However, Meisner teaches that creatine is known to be useful for tissue degenerative disorder, such as osteoarthritis. See, particularly, the claims. Ishikawa et al. teaches that lipid metabolism improving agents are useful for treatment of obesity and hyperlipidaemia. Ishikawa et al. also teaches a composition comprising creatine as useful for treatment obesity. See, particularly, the abstract, paragraph 28.

Therefore, it would have been prima facie obvious to a person of ordinary skill in the art, at the time the claimed the invention was made, to employ creatine for treatment of patients with

Application/Control Number: 10/601,279

Art Unit: 1617

obesity and hyperlipidaemia or its related disorders, because creatine is known as a hypolipidemic agent and is useful for treating obesity related disorders such as hyperlipidaemia and osteoarthritis. Further, creatine has been suggested to be useful for reducing body fat.

Response to the Arguments

Applicants' amendments and remarks submitted September 18, 2007 have been fully considered, but are not persuasive.

- 6. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
- 7. Particularly, the cited references as a whole teach creatine is useful for treatment of hyperlipidaemia, osteoarthritis, and are useful for increasing lean body mass without increasing fat. One of ordinary skill in the art would have been motivated to use creatine for treatment of obese patient with hyperlipidaemia, or osteoarthritis. In response to applicant's argument that the cited references do not teach expressly obesity, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).
- 8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 10/601,279

Art Unit: 1617

date of this final action.

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing
